EDUCATION

University of Central Florida   Orlando, FL
Bachelor of Information Technology   *Aug 2019 – Dec 2023*
GPA: 3.4 / 4.0
Term Honors: Dean's list (Fall 2020, Fall 2022)

EXPERIENCE

UCF Socio-Technical Interaction Research Lab   Remote
Frontend Developer   *June 2022 – Sep 2022*
- Developed highly responsive user interface components using React concepts.
- Designed a better UI from scratch using Figma to increase sales and improve user experience.
- Troubleshot interface software and updated project dependencies.
- Collaborated with the development team and built reusable components for future use.

Teammers   Orlando, FL
Co-founder & Product Designer   *Mar 2021 – June 2022*
- Led 8 individuals on the team to deliver high quality software conforming to Agile development standards.
- Maintained a deep knowledge of the market and gained 1000+ users in less than 3 months.
- Developed wireframes and prototypes around customer needs and created personas through user data.
- Gathered and evaluated user requirements in collaboration with engineers on the team using Jira.

PROJECTS

Full-Stack Social Media App https://github.com/HasanSafarli/social-media-app   Orlando, FL
Software Developer   *Jan 2023 – Present*
- Built a complete full-stack responsive web application using MERN stack.
- Handled authentication and authorization for the application with Node.js.
- Designed an ERD diagram and implemented a database solution using MongoDB.

Navigation System (Hackathon Project) https://github.com/DyroZang/VoiceDrivingGameHackathon   Orlando, FL
React.js Developer   *Oct 2022*
- Collaborated with a group of 7 people to develop a navigation system that takes in auditory input.
- Completed the project in 48 hours using React.js, Three.js and Radisys API.
- Built a pitch deck after completing the project and presented it in front of a developer community.

Food Delivery App https://github.com/HasanSafarli/food-delivery-app   Orlando, FL
React Native Mobile Developer   *Sep 2022 – Oct 2022*
- Implemented Redux architecture to boost the performance of the mobile app.
- Used Tailwind CSS for styling and React Native Navigation to navigate between screens.
- Architected Sanity CMS studio to power the backend of the app which made it simple to update the app's contents.
